Lab No.	Sample Number	Variety	Other	Remarks

Sampling and Shipping Procedure:

1. Select 10 onions at random to represent any given area of a field or variety.
2. Put onions in a bag with the label to identify the sample.
3. Place in a cardboard box, seal and ship to lab by UPS* or other delivery service.

Test Package Includes: Pungency and Sugar values per sample.

Also Available: Complete onion management programs that include soil, plant tissue, and pungency sampling analysis.
